

Here are the top recommended resources for USAID staff who are working on or are interested in learning more about LEDS:

[LEDS Checklist](#)

This job aid provides the key questions to assess the quality of a LEDS.

[LEDS Process Map](#)

This map shows all the key LEDS process steps and the components.

[EC-LEDS](#)

The U.S. Government helps partner countries implement LEDS through the EC-LEDS program. The program created and maintains this website to support the objective of building a global dialogue and creating a shared knowledge base on LEDS.

[Climatelinks](#)

The USAID/E3/Office of Global Climate change created and maintains this global knowledge portal for climate change and development practitioners. It provides current information, resources and learning on USAID's work in climate change adaptation, clean energy, sustainable landscapes and integration.

[LEDS Global Partnership](#)

The LEDS Global Partnership is comprised of more than 160 countries, as well as international donor and technical organizations, who are working on climate-resilient, low-emission development around the world. This site provides information on working groups, regions, resources and more.

[Development Impacts Assessment Toolkit](#)

The Development Impacts Assessment (DIA) tool search helps country, regional and local policymakers find tools and resources to assess the impacts of and links between national development priorities and low emission development strategies. This toolkit equips decision makers with information to explore policy options and build consensus with stakeholders to achieve low-emission development that supports national development objectives.
